

System and Method for Using First-Principles Simulation to Facilitate a Semiconductor  
Manufacturing Process

ABSTRACT OF THE DISCLOSURE

A method, system and computer readable medium for facilitating a process performed by a semiconductor processing tool. The method includes inputting data relating to a process performed by the semiconductor processing tool and inputting a first principles physical model relating to the semiconductor processing tool. First principles simulation is then performed using the input data and the physical model to provide a first principles simulation result, and the first principles simulation result is used to facilitate the process performed by the semiconductor processing tool.
